Report on visit to INFOSYS, Pune

About 'SPARK' Program

Infosys Technologies Limited has launched several programs aimed at evolving a model through which Infosys and academic institutions can partner for competitiveness, enhance the pool of highly capable talent or growth requirements in the Information Technology.

One such initiative started by Infosys, which has touched the lives of more than 36000 young people and nearly 2400 members of faculty in 2008-2009, is SPARK. An extraordinary program that aims to raise the aspirations of students. This nation-wide program focuses on the advances Information technology has made, Infosys' role in the growth of IT and how students can learn from it. Spark was launched in August 2008 and has over 2400 volunteers organization-wide, who spend their personal time on Saturdays to run the SPARK program.

Infosys SPARK is a one day exploratory program for students from different age groups and segments from high school to degree and engineering colleges of urban and suburban areas. Through this on-campus event conducted by volunteers, participating students assess their industry readiness and check their aspirations meter.

Words of Experience

We are very thankful to Infosys management from the core of our heart for their invitation of a one day visit to their reputed company INFOSYS, PUNE on 21-08-2010. INFOSYS visit is the most precious possession that we ever had in our life.

In response to their invitation, we got 92 number of entries form B.E. IV, computer & IT classes. Everybody was excited to be the part of their **SPARK** event and mostly wanted to make their presence in the lecture of **Mr. Narayan Murthi, Founder and Chief Mentor, INFOSYS.**

When we reached at the INFOSYS campus, the hospitality provided by them was simply awesome. After an overnight journey, when we reached to Infosys at 7:00 am, we were given 35 rooms to get fresh. We were ready to attend the program at 8:15 am. After having breakfast we had a first session “**Voice of Student**”, which gave us the information about the INFOSYS with a video presentation and in the same session we were asked to share our dream/s with them. An inspiring talk was given by the speaker Ms. Namrata.

After that, a moment came for which we all were waiting, the great chance to attend the speech of Mr. Narayan Murthi. **This was the first time ever, Mr. Narayan Murthi visited SPARK programme and we were fortunate enough to have interactive session with him.** He had given very inspiring and motivational speech that would be very helpful to students in future. After his speech, we had a question-answer session and the way he was giving the answer of the question asked by the students was very much satisfactory. **That was the very memorable moment of our life.**

In next session “**Relevance of IT in Business**”, we came to know about the emerging domain, Credit Card domain, by the splendid seminar. It was a great feeling to be the part of that seminar. It was a technical seminar followed by question answer session.

After this session, we had lunch time of 1 hour. Lunch was arranged by them only.

In the post lunch session “**Project Think Approach**”, which stressed on Team activity, they provided a very good guidance about what are the necessary possessions students need to keep in mind while building an application or project or organizing an event. They made 5 groups of students and each group of students was given a case study to make project planning. Each group was asked to present their project planning and Faculty members & Infosys representatives were jury members. Token prize was given to winner. This was really a nice experience.

At last feedback was taken from the students as well as faculty members. After that, we had a campus visit, in which, we visited various buildings such as Software Development Building (SDB), Sports complex, Training Center Building etc. Walking in the campus itself was fascinating.

We must say it was really an unforgettable visit. Thanks to INFOSYS once again for their kind invitation. We are very much thankful to SCET management, Principal, HOD, Computer Engineering and IT Departments for their kind co-operation in arranging such a memorable visit to INFOSYS, Pune.

Prof. Mayuri Mehta

Prof. Keyur Rana

Prof. Snehal Gandhi

Prof. Ashish Kharvar

& All students

Snaps – Industrial Visit at Infosys, Pune

Students in Presentation – Project Think Approach

Staff members and Students – listening to speech given by Mr. Narayan Murthi

Mr. Narayan Murthi, Founder and Chief Mentor, INFOSYS, Giving inspiring speech to Students who are part of SPARK programme
