About Workshop

Department of Information Technology of Sarvajanic College of Engineering and Technology organized Workshop on “Introduction to Extended Reality (XR)” on **03rd August, 2024**. The hands-on workshop on Introduction to XR aimed to provide students with a foundational understanding of Extended Reality (XR) and practical experience in developing augmented reality (AR) content. XR encompasses virtual reality (VR), augmented reality (AR), and mixed reality (MR), and is increasingly relevant in various industries, including entertainment, education, and healthcare. The workshop focused on AR, leveraging industry-standard software to enable students to create their first AR experiences.

Topics Covered

- Introduction to XR:

Explore the fundamentals and potential of XR technologies.

- Getting Started with Social AR:

Learn how to create engaging AR experiences for social media platforms: Snapchat, Instagram, etc.

- Hands-On Experience:

Use industry-standard software to create your first AR project, guided by experts with over 5 years of experience in the XR industry.

Speakers Details

1. Vivek Thakur.

Award-Winning And Featured Augmented Reality Artist & Developer.

2. Pal Kagrecha.

Meta Certified AR Creator.

Participants' Details

Students of All Engineering Discipline.

Findings

The workshop was designed to give students a hands-on experience with industry-standard software, with a significant focus on Lens Studio powered by Snap AR. This tool empowered students with the ability to create their first AR experiences, thereby bridging the gap between theoretical knowledge and practical application in the field of extended reality.

Students were able to explore the capabilities of Lens Studio and understand the intricacies of AR content creation. They were guided through the process of creating interactive and immersive AR experiences by leveraging the features and functionalities of the software. This practical approach allowed students to grasp key concepts more effectively and facilitated an interactive learning environment.

The workshop encouraged active participation and collaboration among students, fostering a supportive environment for learning and experimentation. Students were able to exchange ideas, seek assistance, and engage in hands-on activities, enhancing their understanding of XR concepts and its practical applications. Furthermore, the workshop provided an opportunity for students to overcome challenges and troubleshoot issues, thereby improving their problem-solving skills in the context of XR development.

The Introduction to XR workshop received positive feedback from the students, who appreciated the practical nature of the training and its alignment with industry standards. The hands-on experience with Lens Studio empowered students to leverage their creativity and technical knowledge to develop AR content, thereby instilling confidence in their XR development capabilities.

In conclusion, the workshop on Introduction to XR successfully provided students with a practical foundation in creating AR experiences using industry-standard software. The hands-on approach, coupled with interactive learning activities, enabled students to gain valuable insights into the exciting field of extended reality and its applications across various domains.

Acknowledgement

We would like to extend our sincere gratitude to Sarvajanic College of Engineering and Technology and Dr. Hiren Patel, Principal, SCET, for providing permission and support to organize such workshop, Shri Bhaskar Cheruku, Registrar, SCET for prompt support. We are thankful to Sarvjanik University for providing conference hall to organize such workshop. We extend our gratitude towards all the invited speakers for sharing their knowledge and throwing lights on to the recent areas of XR. We also thank to all the teaching and non-teaching staff members of IT department for their self-less support.

Glimpse of the Workshop
